SUMMARY

Mobile developer and team lead with **7+ years** building large-scale Android and Flutter products for telecom, government and service companies in Uzbekistan. I lead an Android team — overseeing projects, guiding architecture and mentoring developers — while shipping new apps from zero and keeping high-load production apps healthy. The apps I am responsible for carry **3.5M+ monthly active users** in total, including a national e-government identity app and the country's largest telecom self-service app.

EXPERIENCE

Senior Mobile Developer, Android Team Lead / Telecom Soft

December 2023 – present

Tashkent · tsoft.uz

- Lead the Android team: own project oversight, review how architecture is built on each project, set guidelines and mentor developers.
- **MyUztelecom** — team lead on the operator's self-service app: **2.5M monthly active users** and **\$800k+** of services sold in-app per month (Google Play, Huawei AppGallery).
- **Hamroh** — road-safety app: raised its core structure, carried the security workstream and delivered the MVP as team lead; now advising. 50K MAU, 4.3★ on Google Play.
- **Mediabox** — client for the company's TV / OTT / VOD platform, built for Android phones and Android TV.
- **TSoft HRM** — advisor on the company's HR management app, published on Google Play and the App Store.
- **TelecomCar** and **TelecomChat** — internal ride service (Android + iOS from one Flutter codebase) and a secure messenger for business correspondence.
- Deliver new applications from scratch, keep production apps stable under high load, and work with backend, QA, design and product teams through release.

Mobile Developer / Digital Government Project Management Center

July 2025 – 31 August 2026

Tashkent · id.egov.uz · under the Ministry of Digital Technologies · contract-based

- **OneID mobile** — the national single-identification app that opens every electronic state service through one account: raised it from zero and shipped it for **Android and iOS**.
- **900K monthly active users** and 4.6★ from 5,010 ratings on Google Play.
- Owned the security of application code and of the personal data it processes; implemented and integrated new features.
- Monitored performance, analysed incidents and resolved technical problems in production.

Mobile Developer / ML-Boutique LLC

January 2025 – November 2025

Moscow · remote

- **MyUzbekistan** — travel companion for tourists across Uzbekistan: built both the Android and the iOS app **from scratch in Flutter**. 40K MAU, on Google Play and the App Store.
- Led planning for the mobile side: roadmap, priorities and release coordination with development, design and product.
- Defined technical requirements, guidelines and best practices for the mobile projects.

Software Engineer, Mobile / JSC Uztelecom

April 2019 – December 2023

Tashkent · uztelecom.uz

- Led a mobile development team and mentored junior and mid-level developers.
- Delivered multiple applications from scratch to production for telecommunication services.
- Developed, launched and optimised a high-load application with **3M+ monthly active users**; integrated REST APIs and improved stability and the crash-free rate.

Tashkent

- Built applications from scratch and improved existing ones — among them **EpaUsta**, a loyalty app on Google Play where a master registers by card number, adds purchases by the code on the product package and collects points.
